

LilScottyPippen

I'm a backend developer specializing in Django.

My main goal is to create high-quality web applications that are not only reliable, but also scale easily. My experience in the field of development allows me to effectively solve technical problems and create products.

My skills:

Python

Django

HTML

CSS

JS

MySQL

Projects:

Web-application "NA ZARE"

This is a web application developed for the park hotel "NA ZARE". Its purpose is to provide users with convenient access to viewing and booking hotel apartments over the Internet, providing a wide range and reliable conditions for online booking.

Technology stack:

Frontend:

- HTML
- CSS
- JS

Backend:

- Python/Django
